

Other Applications for **Flee Flea Carpet Powder**

for happy cats and dogs

Flee Flea Carpet Powder is an amazingly versatile product, as it is made of Diatomaceous Earth, which has been called a Miracle Powder. Besides being a fabulous product for ridding carpets, mats and pet beds of fleas, Flee Flea Carpet powder has many other useful applications.

Diatomaceous Earth is a naturally occurring, soft, siliceous sedimentary rock that has been crumbled into a fine powder, and for those who prefer a non-toxic alternative for common household needs, Flee Flea Carpet Powder can help around the home as a:

- ✓ Natural Deodoriser
- ✓ Natural Cleaner around the home
- ✓ Natural Preservative
- ✓ Natural Insecticide in gardens

Flee Flea Carpet Powder absorbs twice its weight in moisture. It can be used as a liquid spray [shake container frequently while using] if you are wanting to avoid the dust in air, and it will then reach maximum effect once dry.

Deodoriser:

- Rubbish Bags and Bins - sprinkle Flee Flea Carpet Powder in bottom of bag or bin. Helps remove any odours and can rid area of bugs and larvae on contact.
- Cat litter – mix Flee Flea carpet powder into cat litter. Will deodorise and absorb moisture. Litter tray will remain drier, smell fresher and require changing less often.
- Vacuum cleaner bag – add approximately two tablespoons of Flee Flea Carpet Powder to bag when changed and again when half full. Deodorises and kills any bugs vacuumed up. Or simply shake a small pile on the carpet and vacuum up.
- Refrigerator – leave small open container of Flee Flea Carpet Powder in fridge to absorb any odours.
- Footwear – Flee Flea Carpet Powder can be added directly to footwear to deodorise and absorb moisture. Or add to knee-length pantyhose or muslin bag, knot and place in footwear when stored.

Cleaning around the home:

- Make soft scrub cleanser for kitchen and bathroom - add a few drops white vinegar or lemon juice and vegetable oil to half a cup of Flee Flea Carpet Powder to make a paste. Add small squirt of detergent and stir until creamy.
- Remove engine oil from concrete floors or driveway - ensure surrounding area is dry, then sprinkle Flee Flea Carpet Powder liberally to completely cover stain. Leave for 24 hours then scrape up and dispose of in rubbish.
- Remove grease or oil from carpet - ensure area dry and sprinkle Flee Flea Carpet Powder on stain. Leave overnight, then vacuum up.
- Remove wet or muddy footprints from carpet - sprinkle Flee Flea Carpet Powder on spots. Brush into carpet and leave to dry for around 1-2 hours, then vacuum up.

Natural preservative of paper & foliage:

- Preserve paper products from mould, mildew and silverfish etc - sprinkle Flee Flea Carpet Powder lightly between pages. Can be left in place for long term storage or for 1-2 days to absorb moisture and then removed.
- Preserve flowers and leaves - cover bottom of plastic, air-tight container with Flee Flea Carpet Powder. Place lid on container and leave undisturbed for 3 days. Open and carefully turn over flowers and leaves. Again leave undisturbed for 3 days. Can be repeated if not fully dried. A layer of light cotton (a use for old hankies) can be used to separate Flee Flea Carpet Powder from directly touching flowers and leaves.

Natural Insecticide in gardens:

- Sprinkle Flee Flea Carpet Powder around wood piles, pools, concrete cracks, vents, bricks or anywhere else bugs are a problem. Can be left indefinitely while dry and reapplied after rain.
